Program

Come and find out how to tackle re dos, retakes, and rewrites without becoming overwhelmed with the amount of work to complete this. By looking at essential learning outcomes, determining what success looks like, and then designing assessments, the switch to standards based grading becomes very inviting. We will discuss the hard questions and ideas around assessment and how to ensure learning, not grading, is the focus of all assessment in the classroom.

This learning opportunity is being offered through a grant from Alberta Education.

Presenters

Dave Martin

Dave Martin has a Master of Mathematics, a Bachelor's degree in Education, and most importantly a Love for Learning. Throughout his career, he has challenged many traditional educational practices such as homework,

tests, and even grading. Currently as a Division Math/Science Lead Teacher, Dave has the opportunity to learn with teachers, and students, from Pre K - Grade 12. You will find Dave tinkering with code, playing with mathematics, or counting by prime numbers.

Registration Notes

Registration includes a continental breakfast and lunch.
